

Public Meeting to Discuss Improvements Coming to Your Neighborhood

This project is located in the Papillion Creek South Basin and includes construction of new sewer along 40th St., 41st St., 42nd St., and Q St. As part of the design, new green infrastructure is being planned for the eastern portion of Hitchcock Park. New bioretention basins will receive stormwater from new inlets on 42nd Street, will detain storm flows and allow for infiltration, then direct the remaining stormwater flows back into the new separate storm system.

The meeting will focus on the alignment of the sewer separation and a general schedule. Please join us on April 18 to learn more.
