

# CSO 212

## 64th Avenue & William Street Project

### PROJECT SCHEDULE:

- Design is complete. Project is expected to bid Q2 2023.

### PROJECT LOCATION:

- In the Papillion Creek North Basin, extending from 61st Street to 66th Street, between Pacific Street and Woolworth Avenue.

**The CSO 212 – 64th Avenue & William Street Project includes the construction of a new storm sewer and conversion of a combined sewer to sanitary sewer to complete the separation in the CSO 212 service area, resulting in the closure of the existing diversion structure.**

This includes construction of an estimated 4,100 feet of storm sewer and may include rehabilitation of a portion of the existing combined sewer that is converted to sanitary sewer.

The project is intended to provide sewer separation in roughly 47 acres of the Papillion Creek North Basin and allow for the deactivation of CSO 212.
